The purpose of the school's Development plan is to better support the element of student achievement. Preliminary evaluations of our Provincial Achievement Test scores, our French Language Acquisition goals, and in discussion with our school council, suggested a need to refocus our staff and student goals on student achievements. In our Relating Academic and Life Skills (REAL) program, a focus on our student achievement was evaluated on the diversity and complexity of each student, with the focus on student communication to support student achievement. In the spring of 2020 our staff further identified student achievement as a source of focus and a point of growth that they would foresee as an area of need for the 2020-2021 school year.

There is clear overlap between the concerns identified by these stakeholder groups. As such at Ecole Broxton Park School our specific focus this year on Student Achievement works towards Parkland Schools vision that "Our students possess the confidence, resilience, insight and skills required to thrive in, and positively impact, the world." As we look into our data to support our development plan, Ecole Broxton Park School will work with all of our stakeholders to align with the Division's Mission to " assure supportive learning environments, meaningful experiences and healthy relationships that create opportunities to develop resilience, to gain diversity in perspectives and to achieve enduring success."

The strategies implemented by our focus group and then the greater staff to achieve increase Student Achievement are founded on teaching and learning strategies that are:

- Purposeful
- Essential
- Relevant
- Authentic
- Responsive
- Excellence in achievement
- based on Trustworthy, respectful relationships
